Part I Introduction and Framework

1	Introduction	3
1.1	Purpose of the Research	3
1.2	Motivation	4
1.3	Problem Statement	4
1.4	Terminology	5
1.4.1	Disaster	5
1.4.2	Recovery	6
1.4.3	Socio-Economic Recovery Activities	8
1.4.4	People as Sensors	9
1.5	Scope of This Study	10
1.6	Contributions of This Study	12
1.7	Structure of the Study	13
	References	15
2	Concept of “People as Sensors”	19
2.1	Background of “People as Sensors”	19
2.1.1	Brief History of Disaster Management and Citizen Participation	19
2.1.2	The “People as Sensors” Approach in the Context of Disaster	20
2.1.3	Potential Use of the “People as Sensors” Approach for Disaster Recovery	21
2.2	Literature Review Focusing on “People as Sensors”	21
2.2.1	Strategies of Literature Review	22
2.2.2	Mining Social Media for Disaster Situational Awareness	22
2.2.3	Local and Non-local to a Disaster	23
2.2.4	Sentiment Analysis	23

2.2.5	Topic Modeling	24
2.2.6	Connections Between Communication on Social Media and Activities in the Real World	24
2.2.7	Discussion	25
2.3	The Study Framework	28
2.4	Summary and Conclusion	30
	References	31
3	Methodology	39
3.1	Case Studies	39
3.2	Research Questions	40
3.3	Socio-economic Recovery Activities	42
3.3.1	Used-Car Market Data	42
3.3.2	Housing Market Data	46
3.3.3	Model for Analyzing Excess Demand (RQ1a and RQ1b)	49
3.4	Social Media Data	50
3.4.1	Twitter	50
3.4.2	Facebook Pages	51
3.4.3	Differences Between Twitter and Facebook Pages	51
3.4.4	Methodology to Analyze Social Media Communication	52
3.4.5	Model for Applying the “People as Sensors” Approach (RQ2)	53
3.5	Summary and Conclusions to This Chapter	54
	References	54
Part II Empirical Studies of Socio-Economic Activities After the Great East Japan Earthquake and Tsunami		
4	The Excess Demand for Used Cars	59
4.1	Data	59
4.2	Model	65
4.2.1	Analysis of the Used-Car Price Differences Between the Damaged Area and the Non-damaged Area	65
4.2.2	Analysis of the Impacts of Vehicle Inspection Certificates on the Used-Car Prices in the Damaged Area	66
4.3	Results	68
4.3.1	The Regional Dummy Differences in the Damaged Area and the Non-damaged Area	68
4.3.2	The Impact of the Vehicle Inspection Certificate Dummy in the Damaged Area	69

4.4	Discussion	69
4.4.1	Used-Car Price Differences Between the Damaged Area and the Non-damaged Area	69
4.4.2	Impacts of the Vehicle Inspection Certificate on Used-Car Prices	72
4.5	Conclusion	73
	References	74
5	The Excess Demand for Housing	75
5.1	Data	75
5.2	Model	78
5.3	Results	79
5.4	Discussion	81
5.5	Conclusion	84
	References	85
 Part II Conclusion to Part II of This Study		
 Part III People as Sensors for Socio-Economic Recovery Activities		
6	Facebook Page Topics and the Excess Demand for Used Cars	91
6.1	Data	91
6.1.1	Communication Data on Social Media: Facebook Page Data Collection	91
6.1.2	Frequently Used Words After the Great East Japan Earthquake and Tsunami	92
6.1.3	Select Disaster-Related Words by Clustering Analysis	93
6.1.4	Principal Component Analysis	93
6.2	Model	96
6.3	Results	98
6.4	Discussion	98
6.5	Conclusion	99
	References	100
7	Topics on Twitter and the Excess Demand for Used Cars	101
7.1	Research Topics of the Chapter	101
7.2	Data	102
7.2.1	Twitter Data	102
7.2.2	Selection of Disaster-Related Communication by Machine Learning Techniques	103
7.2.3	Selection of Tweets Posted from Local and Non-Local Areas	104
7.2.4	Used-Car Data	104

7.2.5	Pre-categorizing Sample Tweets by Conducting a Workshop and Manual Labeling	105
7.2.6	Latent Dirichlet Allocation (LDA)	106
7.3	Model	106
7.4	Results	109
7.5	Discussion	109
7.6	Conclusion	111
	References	112
8	Public Sentiment and the Excess Demand for Used Cars	113
8.1	Research Topics of the Chapter	113
8.2	Data	114
8.2.1	Social Media Data	114
8.2.2	Used-Car Data	117
8.2.3	Sentiment Analysis	117
8.3	Model	119
8.4	Results	120
8.5	Discussion	120
8.6	Conclusion	123
	References	124
9	Social Media Communication and the Excess Demand for Houses	125
9.1	Data	125
9.2	Model	126
9.3	Results	129
9.4	Discussion	129
9.5	Conclusion	131
	Reference	133
 Part III Conclusion to Part III of This Study		
 Part IV A Case Study of Hurricane Sandy		
10	The Excess Demand for Housing After Sandy	143
10.1	Data	143
10.1.1	NYC Housing Market Data	143
10.1.2	Overview of the Housing Market Data in NYC After Hurricane Sandy	145
10.2	Model	147
10.3	Results	148
10.4	Discussion and Conclusion	152
	References	152

11 Social Media Communication and the Excess Demand for Houses	155
11.1 Data	155
11.2 Model	157
11.3 Results	158
11.4 Discussion	159
11.5 Conclusion	159
References	160
 Part IV Conclusion to Part IV of This Study	
 Part V Conclusion	
12 Conclusion	165
12.1 Summary of Findings	165
12.1.1 Summary of Part I	166
12.1.2 Summary of Part II	166
12.1.3 Summary of Part III	167
12.1.4 Summary of Part IV	168
12.2 Answers to Research Questions	169
12.3 Academic Contributions of the Study	172
12.4 Social Impacts of the Study	173
12.5 Limitations and Future Study	174
References	175
 Appendix	177
